Psychometric **Test**

01

Character Test

Evaluates a driver's attitudes, values, and behavior patterns to identify traits that support safe, ethical, and professional conduct on the road.

02

Performance Test

Measures key driving-related skills such as coordination, reaction time, and focus to ensure readiness and operational safety.

Key Benefits

- **Better Hiring Decisions:** Identify high-potential candidates before they're hired.
- **Improved Safety:** Spot risky behaviors early to prevent accidents and violations.
- **Reduced Turnover:** Hire drivers with the right mindset, leading to longer retention.
- **Lower Operational Costs:** Fewer incidents mean savings on repairs and insurance.
- **Stronger Brand Reputation:** Professional, skilled drivers deliver a better experiences.

Performance Test

**Action per
minute -APM**

**Visual
Attention**

**Recognition of
simple and complex
details**

**Depth
Visualization**

Steadiness

**Eye-Hand
Coordination**

Memory

Concentration

**Time / Movement
Anticipation**

**Traffic Perception
Test**

**Visual Reaction
Time and
Accuracy Test**

Performance Test

1. Eye-Hand Coordination

Assesses the ability to synchronize eye and hand movements in continuous tasks, ensuring accurate responses and confident decision-making while driving.

2. Steadiness

Measures the ability to perform precise, controlled movements consistently over extended periods, crucial for maintaining driving accuracy and control.

3. Depth Visualization

Evaluates the ability to judge distances and spatial relationships accurately, supporting quick, effective decision-making in dynamic driving environments.

4. Recognition of Simple and Complex Details

Tests the ability to identify and process both simple and intricate visual details quickly and accurately in various driving scenarios.

Performance Test

5. Visual Attention

Assesses sustained focus and concentration on a specific task, critical for maintaining awareness and avoiding distractions while driving.

6. Actions per Minute

Measures the number of accurate actions performed within a minute, reflecting multitasking efficiency and responsiveness in high-demand driving situations.

7. Visual Reaction Time and Accuracy

Evaluates the speed and precision of responses to changing visual stimuli, indicating adaptability and quick decision-making in fast-paced conditions.

8. Traffic Perception

Assesses the ability to interpret and respond to traffic situations accurately, a fundamental skill for safe and effective driving.

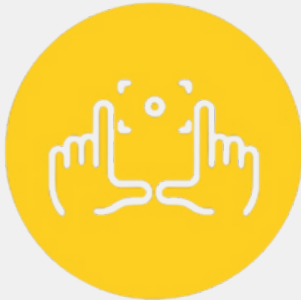

Performance Test

9. Time/Movement Anticipation

Assesses sustained focus and concentration on a specific task, critical for maintaining awareness and avoiding distractions while driving.

10. Concentration

Measures the number of accurate actions performed within a minute, reflecting multitasking efficiency and responsiveness in high-demand driving situations.

11. Memory

Evaluates the speed and precision of responses to changing visual stimuli, indicating adaptability and quick decision-making in fast-paced conditions.
