Lapse

Risk Avoidance

**Environmental
Concern**

Character Test

1. Mental Stability

Measures a driver's resilience, stress management, and emotional control, focusing on coping skills and behavioral responses to driving-related stress.

2. Sense of Responsibility

Assesses a driver's accountability, awareness of consequences, and adherence to traffic laws, reflecting their commitment to safe and responsible driving practices.

3. Self-Control

Evaluates impulse regulation, decision-making, and compliance with traffic regulations, especially in challenging or stressful driving situations.

4. Non-Aggressive Behavior

Measures patience, courtesy, and cooperation with other road users, identifying tendencies to avoid aggressive or hostile driving behaviors.

Character Test

5. Embracing Tranquility

Assesses calmness and composure under traffic stress, revealing how drivers maintain tranquility and sound judgment while driving.

6. Agreeableness

Evaluates a driver's cooperative nature, conflict avoidance, and trust toward others on the road to promote harmonious traffic interactions.

7. Neuroticism

Measures anxiety, emotional instability, and sensitivity to stress, showing how these factors influence driving behavior and risk perception.

8. Environmental Concern

Assesses attitudes toward environmental sustainability in transportation and the level of engagement with eco-friendly driving choices.

Character Test

9. Risk Avoidance

Evaluates hazard awareness, strategic decision-making, and adherence to safety measures to encourage cautious and preventive driving behavior.

10. Lapse

Measures susceptibility to attention lapses, memory errors, and impulsive decisions that can compromise safe driving performance.

11. Violation

Assesses attitudes toward traffic rules and intentions to engage in rule-breaking behaviors while driving.

12. Alcohol Risk

Evaluates attitudes, beliefs, and behaviors related to alcohol consumption and driving, focusing on risk awareness and control.
